Cadbridge, Westmont Hotel Group*

ABOUT GUESTLINK/CII

Since 1988, Communications Integrators, Inc. (Cii) has pioneered electrical solutions,

leading the market in modular power, voice and data systems designed to keep the workplace dynamic and ready for change. Cii's connectivity panels have revolutionized the hospitality industry by enriching the in-room experience for hotel guests, hospital guests, and those who use multiple technology devices.

THOUGHTFUL DESIGN

guestLINK's flexible design blends with the any room environment and allows for placement on the desk, within case goods or in the wall. The PowerWave line is auto-sensing and designed to interface with any third-party, in-room entertainment technology.

POWERWAVE CONNECTIVITY HIGHLIGHTS

- Single HDMI cable connection to HD flat panel TV
- Power section provides two grounded electrical receptacles
- Includes USB charging/data ports and the latest iTouch, iPhone, iPod connectivity

WHAT HOTELIERS ARE SAYING

“In our continuing efforts to provide guests with the most current technology, we are extremely excited to provide the guestLINK connectivity panels in our guest rooms for enjoyment during their stay. The guestLINK product allows compatibility with a

Connecting is easy with the PowerWave as guests' simply plug-and-play their favorite electronics including laptop, iPad, iPod, digital camera, and more. Whether on a business trip or family vacation, the PowerWave transforms the guest room into a world of connectivity — all on the HDTV screen.

guestLINK™'s new PowerWave line is auto-sensing and designed to interface with any third-party, in-room entertainment technology. For more information, contact guestLINK today.
