

## CONQUERING DARKNESS THROUGH LED

Lighting and display products have fast emerged as a major tools to face the challenges posed by the modern age. Long life, low power consumption and

heat distribution, high compatibility with digital ambience, efficient illumination, high density, high contrast, and plug-n-play features are some of the advantages of LED (light-emitting diode) lighting. R.B.

International has come up with products to face the challenges posed by traditional lighting system that design and produce lighting fixtures with LED that does not include any harmful materials such as mercury, sodium, lead and metal halide. The wide range of LED products are provided in various categories – LED Strips, LED Modules, LED Lamps, LED Lightings, LED Bulbs, LED Tubes, Flat Panel Light, Wall Washers, LED Flood Lights, and Controllers/Amplifiers/Dimmers. The Edge Lit Acrylic Displays and Edge lit Aluminium clip on section signages are the most popular products of R.B. International.

## PROVIDING THE MISSING LINKS

In this digital age, gadgets have invariably emerged as constant companions to both business travellers and leisure tourists. Guestlynxx Communications LLP has therefore come up with some innovative products that enable the

guests to plug in their digital camera, camcorder, personal DVD or CD player, laptop, mp3 player, game station, iPod, iTouch, iPhone and various other devices with ease in the hotel rooms. The Guestlynxx PowerWave comes in both

desktop and wall-mount designs. Guestlynxx flexible design blends with room environment, and allows you to locate the PowerWave on a desk, wall or in the case goods. PowerWave includes inputs for HDMI, Composite Video, Left/Right Audio, S-Video, VGA, 3.5 mini Audio in, iPod/iPhone 30 pin, USB pass-through, and RJ45 Internet. The PowerWave also includes two simplexes and a USB charger. A single HDMI cable connects the PowerWave to the HDTV.

## SETU VFXTM—MULTI-PORT VOIP-FXO-FXS GATEWAY

Matrix Telecom has launched SETU VFXTM—the multi-channel SIP-based gateway that offers seamless connectivity between VoIP and POTS networks through FXO and FXS ports. It offers universal and transparent call routing for all types of ports – VoIP-FXO, VoIP-FXS and FXO-FXS. Its call and signal processing capabilities are meant to ensure unrestricted flow of multiple calls with higher speed and better speech quality.

On VoIP side it supports SIP-based IP interface that allows it to connect to any existing IP network. On the POTS side, it supports FXO and FXS interfaces. It can register with multiple SIP servers and IP-PBXs. SETU VFXTM can register with the existing IP-PBX for internal calls and at the same time can also register with ITSP

SIP servers for international calls. Likewise, FXO-FXS ports can also be used to interface with the existing PBX while the other FXO ports can be interfaced with the PSTN, for public calls.

SETU VFXTM offers wide range of features like Programmable Access Codes, Allowed and Denied Numbers, Automatic Number Translation, CLI-based Routing, Emergency Number Dialing, Least Cost Routing, Peer-to-Peer calling and CDR. On the network side, it offers NAT/STUN, PPPoE, Fax over IP, Syslog, etc. It is compact and compatible with all networking products that come with 1U 19" rack mount design.

SETU VFXTM is available in various configurations of 8/16/24/32 FXO or FXS and also in combinations of FXO and FXS Ports. It is a family of multi-channel SIP gateways, specifically designed to cater to SMB and SME segments, up to 32 Ports.
